DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Leen discloses a housing 13 having a hollow interior and a lens opening closed by a transparent lens 25; at least two lamp assemblies (21 and 23) mounted in said housing in line for generating light through said lens 25 ; two switches (63 and 65) mounted on said housing, each said switch turning on and off an associated one of said at least two lamp assemblies, a stand (93 and 97) pivotally attached to said housing, said housing being rotatable about a first axis of rotation relative to said stand; and locking means (see column 3, lines 29-46) on said housing for selectively engaging said stand to prevent rotation of said housing relative to said stand. Regarding claim 14, the stand includes a pair of feet 99 for supporting said housing free standing on a generally horizontal surface.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leen in view of Hillinger. Leen discloses the claimed invention except for the teaching of an aperture in the stand for supporting the stand on a surface. Hillinger teaches an aperture in (38f goes through aperture) a stand that supports the stand on surface 40. It would have been obvious to one skilled in the art to modify the stand of Leen to include an aperture for attaching the stand to a flat surface as taught by Hillinger in order to effectively hold the stand in place.

Allowable Subject Matter

5. Claims 1-11 and 16-20 are allowed. None of the prior art of record teaches the combination of the utility light assembly as claimed in claims 1, 13 and 16 further including "a hook mounted on said stand for movement between a stored position and an in-use position, said housing being rotatable about a second axis of rotation relative to said hook when said hook is in said in-use position for supporting said housing and orienting said lens."

6. Claim 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shirley, Atkins et al, Sidabras and Yu et al all disclose light assemblies which are similar to applicant's invention.
